

Creative team

The project team, composed by OOS (architecture), Bellprat Partner (scenography) and Lorenz Eugster (landscape), won the FDFA's planning competition for the Swiss Pavilion at EXPO 2020 in Dubai. The concept "Reflections" invites the world to experience Switzerland while travelling and to discover surprising aspects of the country.

OOS architects is an owner-managed architectural practice in Zurich with around 30 employees. Their core competence lies in the consulting, design and planning of corporate architecture. They translate the values and positioning of their clients into space. The results are tailor-made environments for experience and work in the scales of urban planning, architecture and interior design.

Bellprat Partner is a design studio for the conception and realisation of exhibitions, brand worlds, tourist destinations and world expos. The studio is located in Zurich and works worldwide since 1981. Their interdisciplinary team - scenographers, concept developers, storytellers, multimedia designers, illustrators, project manager - stages environments that enable messages to be experienced through all five senses.

Lorenz Eugster Landscape Architecture and Urban Planning designs and creates gardens, open spaces and landscapes in urban, peripheral and rural contexts. Based in Zurich, the office was founded in 2009 by Lorenz Eugster. It arose from the need to cultivate an integral view of the themes of landscape and open space.
